

Live

Verify vehicles and drivers

Scan and decrypt the barcode on a vehicle license disc and a driver's licence card, instantly returning real-time, accurate verification information.

Identify if the car is one you want to trade-in and if the person is someone you want to do business with, all in the matter of seconds.

Features include:

The **financed interest information** is the most accurate in the market, sourced in real-time. Our process is POPI compliant.

Scan allows for instant electronic processing of contact information, storing copies of driver's licences for test drives and prepopulation of finance applications.

EzScore performs a basic affordability test on a potential customer, without performing a credit enquiry. It provides an indication of risk and financial affluence.

Trade and retail values on current year models, including a comprehensive list of vehicles available in the market.

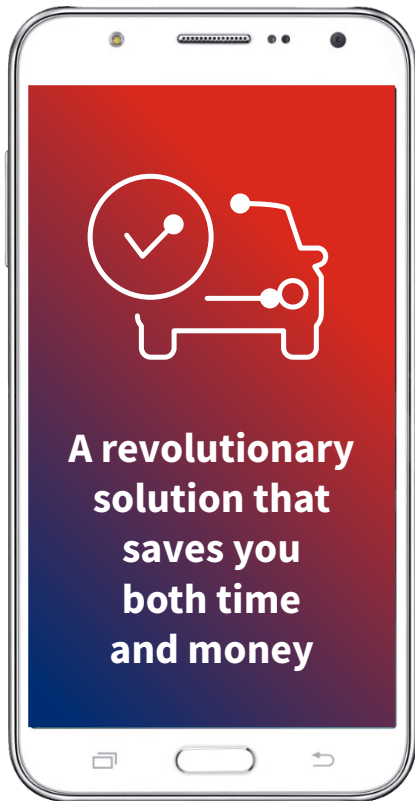

Vehicle verification offers accurate vehicle descriptions, validation of the VIN number, engine number, make, model and type.
